You need to know	<ul style="list-style-type: none"> • If a customer redeems the TD on a day other the maturity date, redemption penalty applies. • TDs are automatically renewed* • TDs are automatically renewed if held as collaterals for a credit facility

Redemption Criteria:

Time Deposits Redemption

Local currency redemption:

A. Time Deposits with Payout at Maturity

TD redemption is calculated where the interest applied is calculated on the total TD period (number of days) from issuance date up to redemption date reduced by a penalty on the applied interest for expended tenor. The penalty applied depends on the time deposit type & tenor.

Example: A customer booked a 3 months TD with amount of 50,000 EGP started at 9-1-20XX with interest rate 6.00%. If the customer wants to redeem the money after 41 days, a penalty of 3% from the nearest tenor interest rate (one month 5.50%) will be deducted. The customer will receive an annual interest rate of 2.50% (one-month TD rate 5.50% – 3% penalty applied) so final will be 2.50% equal to EGP 140 as shown below:

Amount	Actual Interest	Interest after Penalty	Interest on One Month	Redemption Period	Interest Received after Redemption
EGP 50,000	6.00%	2.50%	5.50%	41 days	EGP 140 $(41 \text{ days} \times 50,000 \times 2.50\%)$ 365

B. Time Deposits with Monthly Payout

TD redemption is calculated where a penalty of 3.50% is deducted from the initial TD interest applied..

Example: A customer booked a 3 months TD (with monthly payout) with amount of 50,000 EGP started at 9-1-20XX with interest rate 5.50%. If the customer wants to redeem the money after 61 days, the interest for the TD will be recalculated for the number of days consumed according to the TD interest rate - 3.5%. The customer will receive an annual interest rate of 2% (3-month smart TD rate - 3.50% penalty applied) so the customer will finally receive EGP 49,709 instead of EGP 50,000 to cover the excess amounts (EGP 291) previously received before redemption penalty.

Amount	Actual Interest	Interest after penalty	Redemption period	Recalculated Interest after redemption	Interest Received before Redemption	Amounts due on customer to Bank
EGP 50,000	5.50%	2%	61 Days	EGP 167 $(50,000 \times 2\% \times 61)$ 365	EGP 458 $(5.50\% \times 50,000) \times 2$ 12	EGP 291 (458-167)

Foreign Currency Redemption:

TD redemption is calculated differently where the interest applied is that of the current account of the respective currency calculated on the total TD period (number of days) from issuance date up to redemption date.

Regarding TD Foreign Currency Redemption rule only principle Amount will be credited into customer account without calculating any interest as no interest on current account with foreign Currency is taking place.
